## PARASITE CONTROL

All dogs are required to be on an effective parasite (flea, worm, etc.) control program - either monthly or seasonally. Some preventives are best for controlling the overall populations by inhibiting reproduction but not the bite. Others kill the parasite on contact with the dog's skin. K9HQ prefers the latter as some dogs develop allergic reactions to the fleabite. It is suggested that you discuss with your veterinarian which product is the most suitable for your dog considering he/she would be attending doggy daycare.

Do you use the product...  MONTHLY  SEASONALLY May1- Oct31

Please tell us which parasite preventative control do you use?
